

**Topic 1**

<b>The Germ Theory of Disease</b>	
<b>Scheme of Work</b>	
Suggested scheme of work for teaching the topic. <a href="http://www.scienceinsocietyadvanced.org/as/topics/the-germ-theory-of-disease-sow,45,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/the-germ-theory-of-disease-sow,45,AR.html</a>	
<b>Introduction to germ theory</b>	PowerPoint slides
This short set of power point slides presents data on changing causes of death in the UK since 1850 and invites discussion on these changes. It then introduces a comparison with Kenya today. It is a good way of introducing themes that will be important through several topics. <a href="http://www.scienceinsocietyadvanced.org/as/topics/the-germ-theory-of-disease-activities,43,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/the-germ-theory-of-disease-activities,43,AR.html</a>	
<b>LSS: Believe it or not</b>	Activity
Students examine the claims to truthfulness of statements of different kinds. The aim is to become more critical of the use of language and to develop a constructive scepticism when assessing primary and secondary information. <a href="http://www.scienceinsocietyadvanced.org/data/files/believe-it-or-not-classifying-statements-301.pdf">http://www.scienceinsocietyadvanced.org/data/files/believe-it-or-not-classifying-statements-301.pdf</a>	
<b>John Snow and epidemiology</b>	Activity
This activity extends the textbook account of John Snow's work with a description of his epidemiological work in South London, including quotes from Snow himself. It encourages group discussion of his methods and some of the data he collected. <a href="http://www.scienceinsocietyadvanced.org/data/files/john-snow-and-epidemiology-85.pdf">http://www.scienceinsocietyadvanced.org/data/files/john-snow-and-epidemiology-85.pdf</a>	
<b>LSS: Information revolution</b>	
This activity is about information storage and retrieval, about books and journals, and about comparing print with electronic information storage. Information storage is in the process of transforming how we behave, both because of the ongoing explosion of the quantity of information available and because of increasing ease of access. <a href="http://www.scienceinsocietyadvanced.org/data/files/the-information-revolution-298.pdf">http://www.scienceinsocietyadvanced.org/data/files/the-information-revolution-298.pdf</a>	
<b>Koch and tuberculosis</b>	Activity
This account describes Koch's discovery of the TB bacillus and introduces Koch's postulates. It provides another example of the use of experiments to extend understanding of germ theory. The comprehension questions could be used as homework, review or revision. <a href="http://www.scienceinsocietyadvanced.org/data/files/koch-and-tuberculosis-87.pdf">http://www.scienceinsocietyadvanced.org/data/files/koch-and-tuberculosis-87.pdf</a>	
<b>LSS: Using the internet to find information</b>	Activity
Students first carry out an Internet search to find web sites that would be helpful to answer specific questions about a science topic. In the second part of the activity, students refine their search using a Boolean-style approach, outlined in the briefing sheet. The students then complete a related homework task. <a href="http://www.scienceinsocietyadvanced.org/data/files/using-the-internet-to-find-information-296.pdf">http://www.scienceinsocietyadvanced.org/data/files/using-the-internet-to-find-information-296.pdf</a>	
<b>Development of the germ theory of disease</b>	Activity
This activity could be used as a summary at the end of the topic or as a revision exercise. It provides useful summary notes for exam revision when complete. The aim is to provide an overview and to show how the scientists they will have studied in more detail	

fit into a general scheme. It will encourage use of the textbook and other resources to find information.

<http://www.scienceinsocietyadvanced.org/data/files/development-of-germ-theory-of-disease-83.pdf>

**Website List**

Web links & other resources

Addresses of websites where useful information can be found.

<http://www.scienceinsocietyadvanced.org/as/topics/the-germ-theory-of-disease-web-links,44,AR.html>

**Topic 2**

<b>Infectious diseases now</b>	
<b>Scheme of Work</b> Suggested scheme of work for teaching the topic. <a href="http://www.scienceinsocietyadvanced.org/as/topics/infections-diseases-now-scheme-of-work,62,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/infections-diseases-now-scheme-of-work,62,AR.html</a>	
<b>Infectious diseases in the news</b>	Activity
This is an introductory activity which encourages students to begin to use newspapers and magazines to complement their SiS classes. It is intended to be used early on in the course and followed up by more detailed comprehension and critical reading activities later. <a href="http://www.scienceinsocietyadvanced.org/data/files/infectious-diseases-in-the-news-28.pdf">http://www.scienceinsocietyadvanced.org/data/files/infectious-diseases-in-the-news-28.pdf</a>	
<b>Arguments about food poisoning</b>	Activity
This short activity is one of several designed to help students improve their argument skills. It introduces them to the basic structure of an argument and asks them to analyse and evaluate three arguments used in information about food poisoning. <a href="http://www.scienceinsocietyadvanced.org/data/files/1-2-arguments-about-food-poisoning-2-156.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-2-arguments-about-food-poisoning-2-156.pdf</a>	
<b>Safer birth in Chad: Maternal mortality today</b>	Activity
This activity focuses on health problems in Chad, to demonstrate that even when a scientific theory has been strongly supported by evidence and used for many years it will not always be adopted for complex social and economic factors. It introduces a discussion of some reasons for poor health in Low Income Countries today. <a href="http://www.scienceinsocietyadvanced.org/data/files/safer-birth-in-chad-30.pdf">http://www.scienceinsocietyadvanced.org/data/files/safer-birth-in-chad-30.pdf</a>	
<b>Measuring health</b>	Activity
This activity looks at ways of measuring the health of a population. Students learn how to use scatter graphs to investigate correlations between health indicators and other factors that may affect health. <a href="http://www.scienceinsocietyadvanced.org/data/files/measuring-health-19-32.pdf">http://www.scienceinsocietyadvanced.org/data/files/measuring-health-19-32.pdf</a>	
<b>LSS: Extracting key information from a scientific article at 'first glance'</b>	Activity
Students learn about the basic structure and style of scientific articles by first testing their own ability to extract key information from such an article. The teacher led part of the activity will help students formalise their approach. It is important to note that the articles used here should be not be research papers, but should be less formal articles which are more accessible. <a href="http://www.scienceinsocietyadvanced.org/data/files/extracting-key-information-at-first-glance-317.pdf">http://www.scienceinsocietyadvanced.org/data/files/extracting-key-information-at-first-glance-317.pdf</a>	
<b>Antibiotic role play</b>	Activity
In this role play students have to explain the uses and limitations of antibiotics in their own words for a popular audience. It provides a good opportunity to clarify their understanding of antibiotics and to practice talking about what they know. It is best done at the end of the topic to reinforce the ideas. <a href="http://www.scienceinsocietyadvanced.org/data/files/antibiotic-role-play-34.pdf">http://www.scienceinsocietyadvanced.org/data/files/antibiotic-role-play-34.pdf</a>	

<b>LSS: Speed survey</b>	Activity
Surveys are an important method of information retrieval, and this activity allows students to evaluate the process of collecting data from short interviews with their peers. <a href="http://www.scienceinsocietyadvanced.org/data/files/speed-survey-319.pdf">http://www.scienceinsocietyadvanced.org/data/files/speed-survey-319.pdf</a>	
<b>HIV discussion statements</b>	Activity
These statements are a good way of starting a study of AIDS. They have proved very effective in stimulating interest and discussion. Their use may lead on to a more open discussion and information sharing session in some groups. <a href="http://www.scienceinsocietyadvanced.org/data/files/hiv-discussion-statements-36.pdf">http://www.scienceinsocietyadvanced.org/data/files/hiv-discussion-statements-36.pdf</a>	
<b>LSS: Let's get critical</b>	Activity
We're all used to watching people, especially scientists, present their area of expertise, but what makes a presenter a good one, and would you do it differently? This activity develops the skills of giving and receiving constructive criticism on students' own presentations. <a href="http://www.scienceinsocietyadvanced.org/data/files/lets-get-critical-314.pdf">http://www.scienceinsocietyadvanced.org/data/files/lets-get-critical-314.pdf</a>	
<b>Cells: animal cells, bacteria and viruses</b>	Activity
This activity will revise the structure of an animal cell and the microorganisms that can cause disease. Students colour in labels and structures on a typical animal cell, a bacterial cell and a virus. It will take about 15 minutes. <a href="http://www.scienceinsocietyadvanced.org/data/files/cells-bacteria-and-viruses-16.pdf">http://www.scienceinsocietyadvanced.org/data/files/cells-bacteria-and-viruses-16.pdf</a>	
<b>LSS: Delving deeper into an article in the 'second glance'</b>	Activity
Having completed the activity 'Extracting key information from a scientific article at first glance', students now develop their ability to gain a more detailed sense of the structure and subject matter of an article. <a href="http://www.scienceinsocietyadvanced.org/data/files/delving-deeper-into-an-article-at-second-glance-311.pdf">http://www.scienceinsocietyadvanced.org/data/files/delving-deeper-into-an-article-at-second-glance-311.pdf</a>	
<b>Spread of infectious diseases</b>	Activity
This simple computer model allows students to visualise the spread of an infectious disease and to see how different parameters can affect the rate and extent of the spread. Students can quickly investigate different parameters. Discussion questions link the findings to the real world. <a href="http://www.scienceinsocietyadvanced.org/data/files/spread-of-infectious-diseases-25-39.pdf">http://www.scienceinsocietyadvanced.org/data/files/spread-of-infectious-diseases-25-39.pdf</a>	
<b>Microbe sex/Antibiotic action</b>	Activity
In this activity students, working in small groups, will make a movie showing microbe reproduction or antibiotic action. Although many students will have been taught about this topic, being able to make their own models helps understanding and recall of the information. <a href="http://www.scienceinsocietyadvanced.org/data/files/microbe-sex-41.pdf">http://www.scienceinsocietyadvanced.org/data/files/microbe-sex-41.pdf</a>	
<b>Visit to the Edward Jenner Museum</b>	Activity
The Edward Jenner Museum at Berkeley, Gloucestershire is well worth a class visit if you are in the South West. Students can learn about the history of smallpox, Jenner's work and the disease's final eradication and also about modern understanding of immunology. <a href="http://www.scienceinsocietyadvanced.org/data/files/visit-to-the-edward-jenner-museum-341.pdf">http://www.scienceinsocietyadvanced.org/data/files/visit-to-the-edward-jenner-museum-341.pdf</a>	
<b>Exam Style Question On HIV</b>	Activity
This question reviews some science explanations and the use of statistical indicators in	

the context of HIV. It also includes decision making about health care provision.

<http://www.scienceinsocietyadvanced.org/data/files/exam-style-question-on-hiv-343.pdf>

**Website List**

Web links & other resources

Addresses of websites where useful information can be found.

<http://www.scienceinsocietyadvanced.org/as/topics/weblinks-for-infectious-diseases-now,57,AR.html>

## Topic 3

<b>Transport issues</b>	
<b>Scheme of Work</b>	
Suggested scheme of work for teaching the topic. <a href="http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-transport-issues,65,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-transport-issues,65,AR.html</a>	
<b>Transport attitudes</b>	Activity
This short introductory activity encourages students to think about how different groups in society have different transport needs and a diverse range of views on transport policies. <a href="http://www.scienceinsocietyadvanced.org/data/files/transport-attitudes-thermometer-70.pdf">http://www.scienceinsocietyadvanced.org/data/files/transport-attitudes-thermometer-70.pdf</a>	
<b>LSS: Skim reading a series of articles</b>	Activity
In this activity, a series of brief articles is presented to the students who complete individual and / or group exercises to explore and develop their approach to reading text. The skills developed in this activity will be useful for the Media watch activity. <a href="http://www.scienceinsocietyadvanced.org/data/files/skim-reading-a-series-of-articles-321-2-358.pdf">http://www.scienceinsocietyadvanced.org/data/files/skim-reading-a-series-of-articles-321-2-358.pdf</a>	
<b>Media Watch</b>	Activity
This activity encourages students to investigate how transport issues are portrayed in (mainly) printed media and what these reports show us about how science works. They collect newspaper and magazine articles, adverts and flyers which are concerned with transport issues. <a href="http://www.scienceinsocietyadvanced.org/data/files/media-watch-49.pdf">http://www.scienceinsocietyadvanced.org/data/files/media-watch-49.pdf</a>	
<b>Measurement errors</b>	Activity
Some ideas for a quick activity to demonstrate the inherent error in any measurement, using thermometers, watches or rulers. It shows how even a simple measurement is subject to both random and systematic error. It should take about 15 minutes. <a href="http://www.scienceinsocietyadvanced.org/data/files/measurement-errors-62.pdf">http://www.scienceinsocietyadvanced.org/data/files/measurement-errors-62.pdf</a>	
<b>Exam style question</b>	Activity
This activity is very similar to the sort of questions students will meet in the final exam, though longer. It includes questions on science explanations, on data interpretation and on how science works, reviewing in a new context the causal links ideas met in 1.1 and 1.2. <a href="http://www.scienceinsocietyadvanced.org/data/files/exam-style-question-59.pdf">http://www.scienceinsocietyadvanced.org/data/files/exam-style-question-59.pdf</a>	
<b>Air pollution and regulation</b>	Activity
This activity reviews the main evidence used in debates on air pollution regulation. It is one of several written to improve students' argument skills. These skills are important for Unit 2 and for the longer answers in the Unit 1 exam paper. <a href="http://www.scienceinsocietyadvanced.org/data/files/air-pollution-53.pdf">http://www.scienceinsocietyadvanced.org/data/files/air-pollution-53.pdf</a>	
<b>Mumbai</b>	Activity
Air quality is poor in many cities, especially in the less economically developed nations. Now many city authorities are using regulation and new technology to improve the situation. This exercise uses a news item about a policy change in Mumbai (Bombay) as a lead into a discussion about the quality of that decision and the way in which evidence can be used or abused in making a critique of the decision. <a href="http://www.scienceinsocietyadvanced.org/data/files/air-quality-mumbai-1-55.pdf">http://www.scienceinsocietyadvanced.org/data/files/air-quality-mumbai-1-55.pdf</a>	

<p><b>The car of the future - which fuel</b></p> <p>This activity encourages students to use their understanding of energy and of some of the factors that are involved in making decisions. They consider the advantages and disadvantages of using biofuels, hydrogen or lithium batteries to replace fossil fuels.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/car-of-the-future-68.pdf">http://www.scienceinsocietyadvanced.org/data/files/car-of-the-future-68.pdf</a></p>	<p>Activity</p>
<p><b>LSS: Preparing a short presentation</b></p> <p>This activity aims to help students develop the skill of acquiring information from presentations and knowledge of how good presentations are structured and presented. Students then do their own presentation, based on one of four articles about alternative fuels, which will reinforce learning about this topic.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/preparing-a-short-presentation-327-2-360.pdf">http://www.scienceinsocietyadvanced.org/data/files/preparing-a-short-presentation-327-2-360.pdf</a></p>	<p>Activity</p>
<p><b>Transport trends</b></p> <p>In this activity students practice using graphs to obtain information. They consider changes in transport in the UK over the past 25 years, and some possible future trends. They can then select evidence from the data to argue a case either for or against motorway building.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/transport-trends-106.pdf">http://www.scienceinsocietyadvanced.org/data/files/transport-trends-106.pdf</a></p>	<p>Activity</p>
<p><b>LSS: Interpreting graphs</b></p> <p>Using a graph to 'tell a story' is a challenging task but provides insights into methods of data collection as well as scientific understanding of phenomena. It can help students to recognise limitations in experimental methods. This activity offers an alternative approach to the same graphs as in the Transport Trends activity.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/interpreting-graphs-v2-354.pdf">http://www.scienceinsocietyadvanced.org/data/files/interpreting-graphs-v2-354.pdf</a></p>	<p>Activity</p>
<p><b>LSS: Processing and representing data</b></p> <p>Scientists often have to interpret large amounts of complex data. In order to do so, they need to be able to process the raw data into a form that is easy to understand. In this activity, students are given a set of raw data and are asked to convert it into a data table, then to select an appropriate visual presentation.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/processing-and-representing-data-326.pdf">http://www.scienceinsocietyadvanced.org/data/files/processing-and-representing-data-326.pdf</a></p>	<p>Activity</p>
<p><b>Particle collection practical</b></p> <p>This activity gives students direct practical experience of some of the issues involved in collecting and analysing data on air pollution. It is designed to be run over two sessions. In the first session students will make their dust collectors and decide where to place them, and in the second session they will collect and analyse their data.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/particle-collection-practical-104.pdf">http://www.scienceinsocietyadvanced.org/data/files/particle-collection-practical-104.pdf</a></p>	<p>Activity</p>
<p><b>Website List</b></p> <p>Addresses of websites where useful information can be found.</p> <p><a href="http://www.scpub.org/resources/medical-ethics,3,MO,WL.html">http://www.scpub.org/resources/medical-ethics,3,MO,WL.html</a></p>	<p>Web links &amp; other resources</p>

## Topic 4

<b>Medicines</b>	
<b>Scheme of Work</b> Suggested scheme of work for teaching the topic. <a href="http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-medicines,68,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-medicines,68,AR.html</a>	
<b>Ibuprofen?</b>	Activity
In this short discussion activity students look at a patient information leaflet on Ibuprofen, a widely used painkiller, and discuss answers to questions about it. It is intended as an introduction to the topic of medicines, to raise issues of effectiveness and side effects. The importance of research, to make sure a drug is both effective and adequately safe, is raised. It may also encourage students to make use of such information in their own health care. <a href="http://www.scienceinsocietyadvanced.org/data/files/ibuprofen-95.pdf">http://www.scienceinsocietyadvanced.org/data/files/ibuprofen-95.pdf</a>	
<b>LSS: Listening to a podcast</b>	Activity
The advent of the podcast, which can be downloaded onto a computer or portable audio player and listened to at anytime, is revolutionising the way programmes and information are being disseminated. This activity helps students to improve their learning from listening. The technique of note-taking in this activity can be used for any presentation or lecture. Students should be reminded to use it when appropriate. A suggested podcast by Clifford Rosen, from the Maine Center for Osteoporosis, Bangor, US, is available to download from the <a href="http://www.royalsocietypublishing.org">Royal Society of Chemistry</a> website. <a href="http://www.scienceinsocietyadvanced.org/data/files/listening-to-a-podcast-367.pdf">http://www.scienceinsocietyadvanced.org/data/files/listening-to-a-podcast-367.pdf</a>	
<b>Clinical trials</b>	Activity
This activity illustrates the need for the different features of a clinical trial, using sets of data. Students consider the importance of control groups, randomisation and blinding and compare two trials with different size samples. <a href="http://www.scienceinsocietyadvanced.org/data/files/clinical-trials-97.pdf">http://www.scienceinsocietyadvanced.org/data/files/clinical-trials-97.pdf</a>	
<b>LSS: Preparing a longer presentation</b>	Activity
This activity develops the skills needed to prepare and deliver a formal presentation. The presentations will be delivered and evaluated as part of the activity 'Evaluating presentations'. <a href="http://www.scienceinsocietyadvanced.org/data/files/preparing-a-longer-presentation-369.pdf">http://www.scienceinsocietyadvanced.org/data/files/preparing-a-longer-presentation-369.pdf</a>	
<b>Home remedies</b>	Activity
From the first time we fall over and our parent 'kisses it better' we are exposed to the efficacy of Complementary and Alternative Medicine, CAM. All families have their own home remedies, some of which are widely used, others may be particular to a certain ethnic group or region of the country. A class discussion on what students and their families use at home provides an interesting introduction to CAM. It will take between 15 and 30 minutes. <a href="http://www.scienceinsocietyadvanced.org/data/files/home-remedies-98.pdf">http://www.scienceinsocietyadvanced.org/data/files/home-remedies-98.pdf</a>	
<b>Drug development</b>	Activity
In this activity, students review the stages in the development of a new drug, and check their understanding of the reasons for each stage. <a href="http://www.scienceinsocietyadvanced.org/data/files/drug-development-96.pdf">http://www.scienceinsocietyadvanced.org/data/files/drug-development-96.pdf</a>	
<b>Data from clinical trials</b>	Activity
This activity has a similar format to many of the AS Science in Society exam questions.	

<p>It presents data from clinical trials and tests understanding of many of the ideas in this topic.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/data-from-clinical-trials-94.pdf">http://www.scienceinsocietyadvanced.org/data/files/data-from-clinical-trials-94.pdf</a></p>
<p><b>LSS: Invite an expert</b> <span style="float: right;">Activity</span></p> <p>This activity gives students the opportunity to choose, organise and benefit from outside expert speakers. There is an emphasis on treating the speaker courteously.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/invite-an-expert-375.pdf">http://www.scienceinsocietyadvanced.org/data/files/invite-an-expert-375.pdf</a></p>
<p><b>Website List</b> <span style="float: right;">Web links &amp; other resources</span></p> <p>Addresses of websites where useful information can be found.</p> <p><a href="http://www.scienceinsocietyadvanced.org/as/topics/weblinks-for-medicines,69,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/weblinks-for-medicines,69,AR.html</a></p>

## Topic 5

<b>Ethical issues in medicine</b>	
<b>Scheme of Work</b>	
Suggested scheme of work for teaching the topic. <a href="http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-ethical-issues-in-medicine,74,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-ethical-issues-in-medicine,74,AR.html</a>	
The set of activities 1- 5 from the <b>Nuffield Council for Bioethics</b> provides a good introduction to the use of animals in different kinds of research and to the idea of the three Rs: refinement, reduction and replacement. <a href="http://www.nuffieldbioethics.org/go/textonly/aboutus/externalactivitiespage_909.html">http://www.nuffieldbioethics.org/go/textonly/aboutus/externalactivitiespage_909.html</a>	
<b>LSS: Identifying arguments, opinions and points of view</b>	Activity
We all encounter the opinions of individuals in reports on scientific developments. This activity gets the students to think about the arguments that different people might make for and against animal experiments. Suitable film clips for this activity can be found on the <a href="#">More4 website</a> . <a href="http://www.scienceinsocietyadvanced.org/data/files/indentifying-argurment-opinions-and-points-of-view-377.pdf">http://www.scienceinsocietyadvanced.org/data/files/indentifying-argurment-opinions-and-points-of-view-377.pdf</a>	
<b>LSS: Watching a film</b>	Activity
This activity guides students through two viewings of a scientific film to help them to focus on specific areas of learning. A suitable film for use with this activity <i>Animals in research: Make up your own mind</i> is available on The Physiological Society <a href="#">website</a> . <a href="http://www.scienceinsocietyadvanced.org/data/files/watching-a-film-380.pdf">http://www.scienceinsocietyadvanced.org/data/files/watching-a-film-380.pdf</a>	
<b>Arguments about using animals</b>	Activity
This short activity is one of a set written to improve Science in Society students' argument skills. It extends the basic model to encourage them to look for unspoken assumptions that may also need to be evaluated when criticising an argument. <a href="http://www.scienceinsocietyadvanced.org/data/files/animals-testing-medicines-162.pdf">http://www.scienceinsocietyadvanced.org/data/files/animals-testing-medicines-162.pdf</a>	
<b>Discussing animal ethics</b>	Activity
This activity encourages students to use two ethical frameworks to justify their own general position on animal testing. It then introduces some specific examples of animal experiments that did involve some suffering` and asks them to apply the same approach in forming an opinion on these research projects. <a href="http://www.scienceinsocietyadvanced.org/data/files/discussing-animal-ethics-147.pdf">http://www.scienceinsocietyadvanced.org/data/files/discussing-animal-ethics-147.pdf</a>	
Activity 6 from the <b>Nuffield Council for Bioethics</b> "helps students to become aware of the motives behind the material that pressure groups and other organisations present to the public. Students explore a range of websites with the help of a list of questions in order to come to conclusions." <a href="http://www.nuffieldbioethics.org/go/textonly/aboutus/externalactivitiespage_909.html">http://www.nuffieldbioethics.org/go/textonly/aboutus/externalactivitiespage_909.html</a>	
This <b>online activity</b> summarises the important ethical issues in research on human subjects and describes some of the guidelines. <a href="http://www.wellcome.ac.uk/Professional-resources/Education-resources/Big-Picture/Drug-development/Student-activity/index.htm">http://www.wellcome.ac.uk/Professional-resources/Education-resources/Big-Picture/Drug-development/Student-activity/index.htm</a>	
A role play from the <b>Wellcome Big Picture series</b> . Three different drugs - tackling obesity, HIV/AIDS and heart disease - have had successful phase II trials but the company can only afford to run expensive phase III trials on one of them. But which one will it be? Review each of the proposals, take part in a debate to discuss the issues involved and vote on the drug in which you think the company should invest.	

<a href="http://www.wellcome.ac.uk/Professional-resources/Education-resources/Big-Picture/Drug-developm">http://www.wellcome.ac.uk/Professional-resources/Education-resources/Big-Picture/Drug-developm</a>	
<b>Clinical trials in developing countries</b>	Activity
This activity looks at some of the issues raised by conducting clinical trials in developing countries. It allows students to review some of the ethical principles involved and to discuss the difficulties. <a href="http://www.scienceinsocietyadvanced.org/data/files/clinical-trials-in-developing-countries-148.pdf">http://www.scienceinsocietyadvanced.org/data/files/clinical-trials-in-developing-countries-148.pdf</a>	
<b>True or False statements about Stem Cells</b>	Activity
This short activity allows students to check that they understand some of the science behind stem cells and cloning and can distinguish what is possible now from what is hoped for in the future. <a href="http://www.scienceinsocietyadvanced.org/data/files/true-or-false-statements-about-stem-cells-150.pdf">http://www.scienceinsocietyadvanced.org/data/files/true-or-false-statements-about-stem-cells-150.pdf</a>	
<b>LSS: Writing a scientific review article</b>	Activity
In this activity, students write an article, paying particular attention to the structure, content, language and format used. This activity should be carried out in conjunction with 'Writing an abstract' and 'Compiling a bibliography', with 'Evaluating scientific writing' presenting an opportunity to evaluate the work. <a href="http://www.scienceinsocietyadvanced.org/data/files/writing-a-scientific-review-article-382.pdf">http://www.scienceinsocietyadvanced.org/data/files/writing-a-scientific-review-article-382.pdf</a>	
<b>LSS: Writing an abstract</b>	Activity
Students write an abstract for the article completed in 'Writing a scientific review article'. It is recommended that this activity is carried out after the students have completed their final draft of the article. <a href="http://www.scienceinsocietyadvanced.org/data/files/writing-an-abstract-384.pdf">http://www.scienceinsocietyadvanced.org/data/files/writing-an-abstract-384.pdf</a>	
<b>LSS: Compiling a bibliography</b>	Activity
Students learn about the importance of a comprehensive and accurate bibliography, before compiling one of their own for the article they wrote about stem cells. <a href="http://www.scienceinsocietyadvanced.org/data/files/compiling-a-bibliography-386.pdf">http://www.scienceinsocietyadvanced.org/data/files/compiling-a-bibliography-386.pdf</a>	
<b>LSS: Evaluating scientific writing</b>	Activity
After completing the article, with abstract and bibliography, the students now learn about assessing their work according to assessment criteria. <a href="http://www.scienceinsocietyadvanced.org/data/files/evaluating-scientific-writing-394.pdf">http://www.scienceinsocietyadvanced.org/data/files/evaluating-scientific-writing-394.pdf</a>	
<b>LSS: Resources and audiences</b>	Activity
Approaches to communication of a particular topic may vary significantly, according to the audience. This activity is about students' ability to receive information about stem cells and cloning. <a href="http://www.scienceinsocietyadvanced.org/data/files/resources-and-audiences-399.pdf">http://www.scienceinsocietyadvanced.org/data/files/resources-and-audiences-399.pdf</a>	
How do ethics committees reach decisions on new treatments? A role play from the <b>Scottish Institute for Biotechnology Education</b> which gives all the different interest groups a chance to have their say about an experimental stem cell therapy before a decision is made. <a href="http://www.biology.ed.ac.uk/public/sibe/documents/The%20Decision.pdf">http://www.biology.ed.ac.uk/public/sibe/documents/The Decision.pdf</a>	
<b>LSS: Copycat</b>	Activity
In this activity students learn what plagiarism is and why it is wrong. <a href="http://www.scienceinsocietyadvanced.org/data/files/copycat-401.pdf">http://www.scienceinsocietyadvanced.org/data/files/copycat-401.pdf</a>	
<b>Review question on stem cells</b>	Activity

An exam style question on stem cells.

<http://www.scienceinsocietyadvanced.org/data/files/review-question-on-stem-cells-149.pdf>

**Website List**

Web links & other resources

Addresses of websites where useful information can be found.

<http://www.scienceinsocietyadvanced.org/as/topics/web-links-for-ethical-issues-in-medicine,106,AR.html>

## Topic 6

<b>Reproductive choices</b>	
<b>Scheme of Work</b>	
Suggested scheme of work for teaching the topic. <a href="http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-reproductive-choices,75,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-reproductive-choices,75,AR.html</a>	
<b>The Gift</b>	
This is a moving and informative play about an inherited disease and its affect on one family. The DVD has to be purchased. Related activities are available free on the Y-touring web site. <a href="http://www.ytouring.org.uk/Media/giftvideo.html">http://www.ytouring.org.uk/Media/giftvideo.html</a>	
<b>LSS: Appropriate levels of communication</b>	
In this activity students pick out what makes a science story accessible and learn how to write at an appropriate level for a particular audience. <a href="http://www.scienceinsocietyadvanced.org/data/files/appropriate-levels-of-communication-409.pdf">http://www.scienceinsocietyadvanced.org/data/files/appropriate-levels-of-communication-409.pdf</a>	
<b>Genes and You</b>	
This set of short activities related to inherited diseases covers a variety of issues including individual dilemmas to discuss, information on a several inherited conditions and some future implications. They are designed to bring out the science and the ethical implications. <a href="http://www.gig.org.uk/genesandyoucontents.htm">http://www.gig.org.uk/genesandyoucontents.htm</a>	
<b>Huntington's Disease</b>	Activity
This activity gives a short review of the inheritance of disease caused by a dominant allele. It asks students to justify their opinions on the use of genetic tests for a late onset disease. <a href="http://www.scienceinsocietyadvanced.org/data/files/huntingtons-disease-173.pdf">http://www.scienceinsocietyadvanced.org/data/files/huntingtons-disease-173.pdf</a>	
<b>Antenatal testing</b>	Activity
This activity will introduce students to some of the issues involved in medical screening during pregnancy using different techniques.  Students will also think about false positive and false negative results in relation to such tests, and the possible consequences for prospective parents and society. <a href="http://www.scienceinsocietyadvanced.org/data/files/antenatal-testing-165.pdf">http://www.scienceinsocietyadvanced.org/data/files/antenatal-testing-165.pdf</a>	
<b>Human karyotypes</b>	Activity
In this activity students learn how a sample from amniocentesis is analysed to detect the presence of chromosomal abnormalities. They carry out a practical matching activity and report on the sex and any abnormalities in the karyotype. The activity complements those on antenatal testing and on genetic counselling. <a href="http://www.scienceinsocietyadvanced.org/data/files/human-karyotypes-171.pdf">http://www.scienceinsocietyadvanced.org/data/files/human-karyotypes-171.pdf</a>	
<b>Using ethical frameworks activity</b>	Activity
Students are given a statement about pre-natal screening and a set of ethical arguments that challenge or support the statement. They are asked to decide which ethical framework is being used in each argument. <a href="http://www.scienceinsocietyadvanced.org/data/files/using-ethical-frameworks-177.pdf">http://www.scienceinsocietyadvanced.org/data/files/using-ethical-frameworks-177.pdf</a>	

<p><b>Genetic counselling</b></p> <p>In this activity students will first carry out research into sickle cell and beta thalassaemia and will then watch (or read transcripts from) a number of short clips of people talking about their feelings when they were screened for these genetic diseases.</p> <p>They will then role play a genetic counselling session taking the role of either the pregnant woman/partner, or a genetic counsellor.</p> <p>The whole activity will take at least 1 lesson (although some of the research could be set for homework in a prior lesson).</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/genetic-counselling-169.pdf">http://www.scienceinsocietyadvanced.org/data/files/genetic-counselling-169.pdf</a></p>	<p>Activity</p>
<p><b>Genetic testing and screening</b></p> <p>This activity encourages students to read an article which provides a good overview of the issues involved in genetic testing. It will also teach them useful reading skills, thinking more carefully about the meaning of each section so that they can supply their own headings.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/genetic-testing-and-screening-181.pdf">http://www.scienceinsocietyadvanced.org/data/files/genetic-testing-and-screening-181.pdf</a></p>	<p>Activity</p>
<p><b>Analyse a DNA finger print</b></p> <p>This short activity allows students to actually ‘read’ a set of DNA finger-prints of mother, child and possible father to decide a paternity case.</p> <p><a href="http://www.pbs.org/wgbh/aso/resources/guide/earthappenact3.html">http://www.pbs.org/wgbh/aso/resources/guide/earthappenact3.html</a></p>	
<p><b>Designer babies</b></p> <p>This activity explores the meanings of the term ‘designer baby’. It provides a review of the techniques and the issues associated with the application of genetics to human reproduction. Students align themselves across the room according to their opinion and then justify their position.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/designer-babies-167.pdf">http://www.scienceinsocietyadvanced.org/data/files/designer-babies-167.pdf</a></p>	<p>Activity</p>
<p><b>LSS: Making sense of text: representing it in your own way</b></p> <p>Students read a piece of text and then represent it in the way that best helps them to remember it.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/making-sense-of-text-representing-it-own-way-411.pdf">http://www.scienceinsocietyadvanced.org/data/files/making-sense-of-text-representing-it-own-way-411.pdf</a></p>	<p>Activity</p>
<p><b>Debate on sex selection</b></p> <p>This formal debate on sex selection of children requires good preparation. It encourages students to use their knowledge to develop a persuasive argument.</p> <p><a href="http://www.wellcome.ac.uk/Professional-resources/Education-resources/">http://www.wellcome.ac.uk/Professional-resources/Education-resources/</a></p>	
<p><b>Review question on cystic fibrosis</b></p> <p>This is an exam style question which reviews the genetics of cystic fibrosis, the process of PGD, screening procedures for cystic fibrosis and false positives.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/review-question-on-cystic-fibrosis-175.pdf">http://www.scienceinsocietyadvanced.org/data/files/review-question-on-cystic-fibrosis-175.pdf</a></p>	<p>Activity</p>
<p><b>Website List</b></p> <p>Addresses of websites where useful information can be found.</p> <p><a href="http://www.scienceinsocietyadvanced.org/as/topics/weblinks-for-reproductive-choices,108,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/weblinks-for-reproductive-choices,108,AR.html</a></p>	<p>Web links &amp; other resources</p>

## Topic 7

<b>Radiation: risks and uses</b>	
<b>Scheme of Work</b>	
Suggested scheme of work for teaching the topic. <a href="http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-radiation-risks-and-uses,76,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-radiation-risks-and-uses,76,AR.html</a>	
<b>What risks do you take?</b>	Activity
This activity introduces students to balancing risk, and the different ways people think about risks in their everyday lives. It asks them to consider risks they take in their own lives. Then they act out a scripted conversation in a student bar to stimulate further discussion about the choices people make. <a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-what-risks-do-you-take-final-225.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-what-risks-do-you-take-final-225.pdf</a>	
<b>LSS: Reading and sharing</b>	Activity
Students work in pairs to study the topic of radiation from two very different points of view. They then share their viewpoints and make a summary of key concepts in their preferred styles. <a href="http://www.scienceinsocietyadvanced.org/data/files/reading-and-sharing-421.pdf">http://www.scienceinsocietyadvanced.org/data/files/reading-and-sharing-421.pdf</a>	
<b>Risk your personal choices</b>	Activity
This is another short introductory activity on risk in which students are asked to consider their own risk choices and then to reflect in more detail on the factors that affect their risk decisions. <a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-risk-your-personal-choices-final-227.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-risk-your-personal-choices-final-227.pdf</a>	
<b>Mobile phone use and the precautionary principle</b>	Activity
In this activity students will plan a questionnaire about mobile phone use. They will aim to discover whether current government advice has affected phone use amongst their family and friends. It provides an introduction to the precautionary principle. <a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-mobile-phones-final-229.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-mobile-phones-final-229.pdf</a>	
<b>Talking risk</b>	Activity
Media reports of research often use the term ‘risk’ indiscriminately. In this activity students will look at a 2007 newspaper report of research investigating the link between long-term mobile phone use and brain tumours. They will discuss and answer questions on the difference between relative and absolute risk. <a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-talking-risk-final-231.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-talking-risk-final-231.pdf</a>	
<b>Mobile phones and cancer?</b>	Activity
Students examine data from an extensive research project on the risks from mobile phones and consider the research design and what the results show. They discuss whether the results prove the negative “Mobile phones do not cause cancer”. <a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-mobile-phones-and-cancer-final-247.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-mobile-phones-and-cancer-final-247.pdf</a>	

<b>Edible atoms</b>	Activity
<p>This is a short, fun activity which will help students to recall the structure of the atom that they learnt about in GCSE. They will model atoms using a paper plate and 3 different sorts of sweets. At the end, when they have correctly demonstrated their understanding of atoms and isotopes, you may wish to let them eat their model!</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-edible-atoms-final-233.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-edible-atoms-final-233.pdf</a></p>	
<b>Radioactivity Units</b>	Activity
<p>This is a short activity to explain the differences between the units commonly used for measuring radioactivity, becquerels, grays and sieverts.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-radioactivity-units-final-249.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-radioactivity-units-final-249.pdf</a></p>	
<b>Radioactive dice</b>	Activity
<p>Students often find understanding half-life difficult. This activity is designed to help them visualise the random nature of radioactive decay, and provides a way of producing a half-life graph from which calculations can be made. The activity uses pennies and dice to represent radioactive isotopes with different half-lives.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-radioactive-dice-final-235.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-radioactive-dice-final-235.pdf</a></p>	
<b>Estimating your radiation dose</b>	Activity
<p>This activity should help students develop a clearer understanding of the different sources of radiation to which they are exposed and an appreciation of their relative magnitude. They use information on radon, nuclear power installations, flying and other sources to estimate their own annual dose.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-estimating-radiation-dose-final-241.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-estimating-radiation-dose-final-241.pdf</a></p>	
<b>Uses of radioactivity</b>	Activity
<p>This activity encourages students to use some important concepts in the science of radioactivity to choose which isotope is best suited for different applications in medicine and the environment.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-uses-of-radioactivity-final-240.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-uses-of-radioactivity-final-240.pdf</a></p>	
<b>LSS: Writing a summary</b>	Activity
<p>In this activity, students summarise information from three different sources on the topic 'Is the use of radiation in medicine justified?'</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/writing-a-summary-423.pdf">http://www.scienceinsocietyadvanced.org/data/files/writing-a-summary-423.pdf</a></p>	
<b>Managing radiation doses</b>	Activity
<p>This activity encourages students to consider the principles of radiation protection and how they might apply in the nuclear industry and in medicine. They discuss and answer a set of questions based on exposure data.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-managing-radiation-doses-final-250-345.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-managing-radiation-doses-final-250-345.pdf</a></p>	
<b>Radioactive pigeons</b>	Activity
<p>This activity is based on two reports of an unexpected source of contamination at Sellafield. Students have to answer questions to test their understanding of radioactivity. They then compare the style and content of the two reports and write a newspaper article on the issue.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-radioactive-pigeons-final-253-1-255.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-radioactive-pigeons-final-253-1-255.pdf</a></p>	

<b>Making decisions about using radiation</b>	Activity
This is an exam style activity to help students draw together what they have learnt about radiation and risk, and to use their knowledge to help them make decisions about radiation.	
<a href="http://www.scienceinsocietyadvanced.org/data/files/1-7-decisions-about-using-radiation-final-243.pdf">http://www.scienceinsocietyadvanced.org/data/files/1-7-decisions-about-using-radiation-final-243.pdf</a>	
<b>LSS: Using visuals krypton factor style</b>	Activity
Imagine a world with no visuals. How much time do we waste by using words instead of pictures? In this activity students take turns to describe a visual about radiation. Can their peers recreate the same visual just by listening to the description?	
<a href="http://www.scienceinsocietyadvanced.org/data/files/using-visuals-krypton-factor-style-427.pdf">http://www.scienceinsocietyadvanced.org/data/files/using-visuals-krypton-factor-style-427.pdf</a>	
<b>Website List</b>	Web links & other resources
Addresses of websites where useful information can be found.	
<a href="http://www.scienceinsocietyadvanced.org/as/topics/web-links-for-radiation-risks-and-uses,126,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/web-links-for-radiation-risks-and-uses,126,AR.html</a>	

## Topic 8

<b>Lifestyle and health</b>	
<b>Scheme of Work</b>	
Suggested scheme of work for teaching the topic. <a href="http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-lifestyle-and-health,77,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-lifestyle-and-health,77,AR.html</a>	
<b>LSS: A case study of DCA</b>	Activity
Students consider the drug DCA and the claim that it is a cheap and safe drug that kills most cancers. Using an article produced by Cancer Research UK, they consider how informative the article is and generate further questions that might enhance their understanding of DCA and its implications for the cancer drug industry. <a href="http://www.scienceinsocietyadvanced.org/data/files/a-study-of-dca-432.pdf">http://www.scienceinsocietyadvanced.org/data/files/a-study-of-dca-432.pdf</a>	
<b>LSS: Preparing a scientific poster</b>	Activity
Students create their own poster on the topic of cancer and risk factors. They will improve their ability to summarise information in a range of forms, and will think about how they can communicate scientific ideas using a poster as a cue. <a href="http://www.scienceinsocietyadvanced.org/data/files/preparing-a-scientific-poster-434.pdf">http://www.scienceinsocietyadvanced.org/data/files/preparing-a-scientific-poster-434.pdf</a>	
<b>LSS: Evaluating scientific posters</b>	Activity
Students work in pairs to assess their posters and discuss presenting it verbally. The students swap with another pair to carry out evaluation of the presentation. This is followed by a class discussion on the outcomes. <a href="http://www.scienceinsocietyadvanced.org/data/files/evaluating-scientific-posters-437.pdf">http://www.scienceinsocietyadvanced.org/data/files/evaluating-scientific-posters-437.pdf</a>	
<b>CHD risk game</b>	Activity
This activity is a board game. It introduces the various factors that increase or decrease the risk of coronary heart disease. <a href="http://www.scienceinsocietyadvanced.org/data/files/chd-risk-game-262.pdf">http://www.scienceinsocietyadvanced.org/data/files/chd-risk-game-262.pdf</a>	
<b>LSS: Processing large data sets</b>	Activity
A lot of research relies on collecting lots of data and then looking for trends in the data. In this activity students will have the chance to choose results within the large datasets to focus on, and find out if there are any links between the data. <a href="http://www.scienceinsocietyadvanced.org/data/files/processing-large-data-sets-439.pdf">http://www.scienceinsocietyadvanced.org/data/files/processing-large-data-sets-439.pdf</a>	
<b>Why treat people...?</b>	Activity
This activity asks students to consider some of the wider social factors affecting health in the context of the WHO publication <i>Closing the gap in a generation</i> . They will be asked to rank factors and to justify their decision. This should provide a good opportunity for debate. <a href="http://www.scienceinsocietyadvanced.org/data/files/why-treat-people-265.pdf">http://www.scienceinsocietyadvanced.org/data/files/why-treat-people-265.pdf</a>	
<b>Alcohol</b>	Activity
This activity involves some quick multichoice questions on alcohol and then a data analysis question on relative and absolute risks. <a href="http://www.scienceinsocietyadvanced.org/data/files/alcohol-268.pdf">http://www.scienceinsocietyadvanced.org/data/files/alcohol-268.pdf</a>	
<b>Health Education – bicycle safety</b>	Activity
The government regularly runs public health education campaigns. For example, ‘5-a-day’, ‘Know your units’, and ‘Go smokefree’. Not all are effective. In this activity, students look at research into the effectiveness of a ‘Bike Ed’ programme in Australia. They then discuss the outcomes of other campaigns. <a href="http://www.scienceinsocietyadvanced.org/data/files/health-education-bicycle-safety-270.pdf">http://www.scienceinsocietyadvanced.org/data/files/health-education-bicycle-safety-270.pdf</a>	

<b>Plastic bottles and cancer</b>	Activity
<p>This activity looks at two cancer scares relating to plastic bottles, one an ‘urban myth’ and one where the evidence is still disputed by scientists. Students have to consider conflicting evidence and explain their conclusions.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/plastic-bottles-and-cancer-272.pdf">http://www.scienceinsocietyadvanced.org/data/files/plastic-bottles-and-cancer-272.pdf</a></p>	
<b>LSS: Arranging a scientific report</b>	Activity
<p>In this activity, students identify the structure of scientific studies and compare these with a standard written scientific report (scientific studies are carried out routinely in the food industry and in materials testing).</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/arranging-a-scientific-report-441.pdf">http://www.scienceinsocietyadvanced.org/data/files/arranging-a-scientific-report-441.pdf</a></p>	
<b>The Worried Well – health testing</b>	Activity
<p>Students are asked to consider the use of health testing kits and the significance of results. They discuss how false positives and negatives arise and the effects they may have.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/the-worried-well-health-testing-274.pdf">http://www.scienceinsocietyadvanced.org/data/files/the-worried-well-health-testing-274.pdf</a></p>	
<b>Alcohol – whose responsibility?</b>	Activity
<p>This activity encourages students to decide on what measures they believe are appropriate for the regulation of alcohol consumption and to present these views as an argument. It uses ideas from the Nuffield Council on Bioethics report: Public health - ethical issues.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/alcohol-whose-responsibility-287.pdf">http://www.scienceinsocietyadvanced.org/data/files/alcohol-whose-responsibility-287.pdf</a></p>	
<b>Health in the News</b>	Activity
<p>In this activity students will make use of a website which provides commentaries on health research as reported in the mainstream media. Students will be able to consider what type of research is reported, and how the stories are simplified for the media. This activity provides a good opportunity to look at an original research paper.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/health-in-the-news-277.pdf">http://www.scienceinsocietyadvanced.org/data/files/health-in-the-news-277.pdf</a></p>	
<b>Fruit and vegetables and cancer</b>	Activity
<p>This activity reviews the advantages and disadvantages of case control and cohort studies, in the context of research on the link between fruit and vegetable consumption and cancer risk. It includes data analysis on results from such research.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/fruit-and-vegetables-and-cancer-280.pdf">http://www.scienceinsocietyadvanced.org/data/files/fruit-and-vegetables-and-cancer-280.pdf</a></p>	
<b>Genes or lifestyle? exam style question</b>	Activity
<p>This question looks at the evidence for genetic risk factors for a major cause of blindness, and then at the influence of two lifestyle factors and how these interact with the genetic risks. Finally students have to translate the information into a health education message.</p> <p><a href="http://www.scienceinsocietyadvanced.org/data/files/genes-or-lifestyle-exam-style-question-282.pdf">http://www.scienceinsocietyadvanced.org/data/files/genes-or-lifestyle-exam-style-question-282.pdf</a></p>	
<b>Website List</b>	Web links & other resources
<p>Addresses of websites where useful information can be found.</p> <p><a href="http://www.scienceinsocietyadvanced.org/as/topics/web-links-for-lifestyle-and-health,128,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/web-links-for-lifestyle-and-health,128,AR.html</a></p>	

## Topic 9

<b>Evolution</b>	
<b>Scheme of Work</b>	
Suggested scheme of work for teaching the topic. <a href="http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-evolution,78,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-evolution,78,AR.html</a>	
<b>Creation myths</b>	Activity
Students see a power point presentation with creation myths from several different cultures and then discuss whether they have continuing influence and how these explanations of life compare to scientific explanations. <a href="http://www.scienceinsocietyadvanced.org/data/files/creation-myths-474.pdf">http://www.scienceinsocietyadvanced.org/data/files/creation-myths-474.pdf</a>	
<b>So much diversity .. can it be explained?</b>	Activity
Explaining how all the diverse forms of life on earth arose is at the heart of the “evolution debate”. This activity introduces Lamarck’s more scientific attempt at an explanation. <a href="http://www.scienceinsocietyadvanced.org/data/files/so-much-diversity-can-it-be-explained-473.pdf">http://www.scienceinsocietyadvanced.org/data/files/so-much-diversity-can-it-be-explained-473.pdf</a>	
<b>Evolution cards</b>	Activity
This is a simple activity to match cards but it serves as a good review of the main features of the theory. <a href="http://www.scienceinsocietyadvanced.org/data/files/evolution-cards-476.pdf">http://www.scienceinsocietyadvanced.org/data/files/evolution-cards-476.pdf</a>	
<b>LSS: Writing scientific articles for different audiences</b>	Activity
Students revisit the skill scientific writing, this time with a focus on writing for a more general audience. This is akin to the sort of writing found in newspapers, magazines and some web sites. <a href="http://www.scienceinsocietyadvanced.org/data/files/writing-scientific-articles-for-different-audiences-445.pdf">http://www.scienceinsocietyadvanced.org/data/files/writing-scientific-articles-for-different-audiences-445.pdf</a>	
<b>Darwin’s finches</b>	Activity
This activity asks students to interpret a story about the Galapagos finches in terms of evolution as practice in applying the theory. <a href="http://www.scienceinsocietyadvanced.org/data/files/darwins-finches-469.pdf">http://www.scienceinsocietyadvanced.org/data/files/darwins-finches-469.pdf</a>	
<b>One good theory to another</b>	Activity
This activity encourages students to put Darwin’s ideas in context, by considering some of the other changes in scientific thinking that were happening at the time. They construct a time-line of significant developments. <a href="http://www.scienceinsocietyadvanced.org/data/files/one-good-theory-to-another-471.pdf">http://www.scienceinsocietyadvanced.org/data/files/one-good-theory-to-another-471.pdf</a>	
<b>It’s all in the bones – evidence for evolution</b>	Activity
Students look at diagrams of mammalian limbs and consider the similarities and the adaptations shown. They then discuss how this provides evidence for evolution. <a href="http://www.scienceinsocietyadvanced.org/data/files/its-all-in-the-bones-evidence-for-evolution-475.pdf">http://www.scienceinsocietyadvanced.org/data/files/its-all-in-the-bones-evidence-for-evolution-475.pdf</a>	
<b>Genetics of sickle cell anaemia</b>	Activity
This activity is based on reading an article explaining the genetics and role of natural selection in the disease. Several activities are included on the student sheet to focus their engagement with the text. <a href="http://www.scienceinsocietyadvanced.org/data/files/genetics-of-sickle-cell-anaemia-470.pdf">http://www.scienceinsocietyadvanced.org/data/files/genetics-of-sickle-cell-anaemia-470.pdf</a>	
<b>Sickle cell disease and selection - a simulation</b>	Activity
In this activity, students simulate natural selection of the sickle cell alleles, using beans	

and a flipped coin. They should find that the sickle cell allele rapidly becomes more common where there is a high incidence of malarial infection giving an example of natural selection in practice.

<http://www.scienceinsocietyadvanced.org/data/files/sickle-cell-disease-selection-472.pdf>

**Evolution and creation**

Activity

This activity helps to frame the way students think about the world, and also helps to understand and respect different ways of addressing questions. It is important to be able to categorise frameworks for addressing questions about the universe. If students can do this, it is more likely they will be able to avoid bringing in religious or other unscientific arguments in the place of genuine science.

## Topic 10

<b>The Universe</b>	
<b>Scheme of Work</b>	
Suggested scheme of work for teaching the topic. <a href="http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-the-universe,122,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-the-universe,122,AR.html</a>	
<b>So you think the Earth is round?</b>	Activity
A quick look at the evidence for a flat Earth and a round Earth to introduce: theory, predictions from the theory and the observations used to falsify or support a theory. <a href="http://www.scienceinsocietyadvanced.org/data/files/so-you-think-the-earth-is-round-215.pdf">http://www.scienceinsocietyadvanced.org/data/files/so-you-think-the-earth-is-round-215.pdf</a>	
<b>Stars, wanderers and the cycles of life</b>	PowerPoint slides
A set of 7 powerpoint slides showing beautiful images of the solar system with discussion points suggesting the important influences it exerts on our lives. <a href="http://www.scienceinsocietyadvanced.org/as/topics/activities-for-the-universe,123,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/activities-for-the-universe,123,AR.html</a>	
<b>People of influence</b>	Activity
Students research and report on the roles of some key figures, following a trail from early Greeks through the Arabic world during the European dark ages to the world-changing contribution of Copernicus. They learn how to redraft their reports in the light of comments. <a href="http://www.scienceinsocietyadvanced.org/data/files/stars-and-wanderers-216.pdf">http://www.scienceinsocietyadvanced.org/data/files/stars-and-wanderers-216.pdf</a>	
<b>LSS: Presenting a review using Photostory</b>	Activity
Photo-movies are a powerful means for students to create presentations. In this activity students create a brief presentation on ancient explanations about the universe, and discuss the value of presenting as a way of learning. <a href="http://www.scienceinsocietyadvanced.org/data/files/presenting-a-review-using-phot-story-447.pdf">http://www.scienceinsocietyadvanced.org/data/files/presenting-a-review-using-phot-story-447.pdf</a>	
<b>LSS: Evaluating presentations</b>	Activity
Having done the preparation, students deliver their presentations to a group of their peers as part of a guided evaluation exercise. This activity encourages students to think about the process of giving feedback when they are evaluating other students' presentations. <a href="http://www.scienceinsocietyadvanced.org/data/files/evaluating-presentations-371.pdf">http://www.scienceinsocietyadvanced.org/data/files/evaluating-presentations-371.pdf</a>	
<b>Imperfect heavens</b>	PowerPoint slides
A set of powerpoint slides showing images of the Moon, Sun and Venus as an introduction to the importance of Galileo's work. <a href="http://www.scienceinsocietyadvanced.org/as/topics/activities-for-the-universe,123,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/activities-for-the-universe,123,AR.html</a>	
<b>So you think the Earth goes round the Sun?</b>	Activity
The activity looks at key evidence from observation of the phases of Venus, with a final part that has a similar structure to that of 'So, you think the Earth is round'. It again deals with the nature of theory, prediction and observation, providing a revisit to these sophisticated ideas. <a href="http://www.scienceinsocietyadvanced.org/data/files/stars-and-wanderers-216.pdf">http://www.scienceinsocietyadvanced.org/data/files/stars-and-wanderers-216.pdf</a>	
<b>The truth game</b>	Activity
The activity deals with the key words that are necessary for an understanding of how science works. Students assign examples from this topic to six different categories, such as observation, law or theory.	

<a href="http://www.scienceinsocietyadvanced.org/data/files/the-truth-game-222.pdf">http://www.scienceinsocietyadvanced.org/data/files/the-truth-game-222.pdf</a>	Activity
<p><b>Giants</b></p> <p>Students have already looked at the contributions of Copernicus and Galileo, but it could be argued that it was Kepler's contribution that completed the triumph of the heliocentric view, and it was only this that made the Copernican revolution a lasting one that would influence Isaac Newton and others so strongly. In this activity students compare these 'giants.'</p>	
<a href="http://www.scienceinsocietyadvanced.org/data/files/giants-207.pdf">http://www.scienceinsocietyadvanced.org/data/files/giants-207.pdf</a>	Activity
<p><b>Science predicts – it's what it's good at</b></p> <p>The discovery of Neptune, like other discoveries that have disputed credit, makes a good 'human interest' story that also deals with the science. In this activity students have to imagine the different arguments used by two scientists to explain the movement of Uranus, before Neptune was discovered. They then go on to explore disputed credit in another case of their choice.</p>	
<a href="http://www.scienceinsocietyadvanced.org/data/files/science-predicts-its-what-its-good-at-212.pdf">http://www.scienceinsocietyadvanced.org/data/files/science-predicts-its-what-its-good-at-212.pdf</a>	Activity
<p><b>The changing solar system</b></p> <p>Our understanding of the solar system is still changing. This is an activity that encourages students to research some of this new information and extract a few key points in the way that a journalist does.</p>	
<a href="http://www.scienceinsocietyadvanced.org/data/files/the-changing-solar-system-217.pdf">http://www.scienceinsocietyadvanced.org/data/files/the-changing-solar-system-217.pdf</a>	Activity
<p><b>Hubble – the biggest pictures ever</b></p> <p>This activity takes advantage of the wondrous collection of images on the NASA Hubble Gallery website, and asks students to sort objects according to distance to prepare a display.</p>	
<a href="http://www.scienceinsocietyadvanced.org/data/files/hubble-209.pdf">http://www.scienceinsocietyadvanced.org/data/files/hubble-209.pdf</a>	Activity
<p><b>How far away</b></p> <p>This is a two part activity. The first part is a practical activity looking at the use of parallax to determine distance. The second part uses the 'Powers of Ten' resources to introduce the almost impossible task of imagining the very large numbers involved. There is then an exercise using standard form to express the sizes of different objects in the Universe.</p>	
<a href="http://www.scienceinsocietyadvanced.org/data/files/how-far-away-208.pdf">http://www.scienceinsocietyadvanced.org/data/files/how-far-away-208.pdf</a>	Activity
<p><b>Sharing the Universe</b></p> <p>The textbook provides a concise account of the key points in the development of the idea that our Galaxy is not the entire Universe. There is a lot for students to learn and digest. This study skills activity provides every student with a record of key information, but avoids their having to work alone through all of the relevant textbook pages.</p>	
<a href="http://www.scienceinsocietyadvanced.org/data/files/sharing-the-universe-213.pdf">http://www.scienceinsocietyadvanced.org/data/files/sharing-the-universe-213.pdf</a>	Activity
<p><b>The origin of the Universe</b></p> <p>This activity is in two parts. In the first students look at some predictions made by the Big Bang theory and use the textbook and internet to see whether observations match these predictions. In the second they consider the basic ideas of the Big Bang through a partly scripted dialogue that is modelled on Galileo's dialogues, but transposed to modern setting.</p>	
<a href="http://www.scienceinsocietyadvanced.org/data/files/the-origin-of-the-universe-219.pdf">http://www.scienceinsocietyadvanced.org/data/files/the-origin-of-the-universe-219.pdf</a>	Activity
<p><b>Questions, questions</b></p> <p>Thinking about the Universe raises many questions, some are or will one day be</p>	

answerable by science, some not. In the first part of this activity students discuss these questions, in the second part they use the PEEP resources to think about 'space, the Universe and religion' and review some of their knowledge about the Universe.

<http://www.scienceinsocietyadvanced.org/data/files/questions-questions-210.pdf>

**Review**

Activity

A collective activity to produce revision materials for the topic.

<http://www.scienceinsocietyadvanced.org/data/files/review-211.pdf>

## Topic 11

<b>Scheme of Work</b>	
Suggested scheme of work for teaching the topic. <a href="http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-are-we-alone,132,AR.html">http://www.scienceinsocietyadvanced.org/as/topics/scheme-of-work-for-are-we-alone,132,AR.html</a>	
<b>Cosmic habitats</b>	Activity
The activity provides an introduction to ‘extraterrestrials’ by considering their many and varied forms in fiction and their possible forms, if they exist, in reality. To do so it uses the idea of adaptation, comparing human adaptations to those of extremophiles, and then speculating on alien adaptations to unknown conditions on exoplanets. <a href="http://www.scienceinsocietyadvanced.org/data/files/cosmic-habitats-335.pdf">http://www.scienceinsocietyadvanced.org/data/files/cosmic-habitats-335.pdf</a>	
<b>How could they tell?</b>	Activity
The activities here are about evidence for the existence of life and some of the difficulties in detection. Students can attempt to make an estimation of the number of life-supporting planets that might exist using a simplified Drake equation. They also consider two different examples of research into the possibility of life elsewhere – The SETI Institute and the ESA Darwin Project. <a href="http://www.scienceinsocietyadvanced.org/data/files/how-could-they-tell-349.pdf">http://www.scienceinsocietyadvanced.org/data/files/how-could-they-tell-349.pdf</a>	
<b>LSS: Evaluating articles about the Universe</b>	Activity
Students who understand how their work is assessed are at an advantage. In this activity, students examine assessment criteria, and evaluate three Catalyst articles. <a href="http://www.scienceinsocietyadvanced.org/data/files/evaluate-articles-about-the-universe-453.pdf">http://www.scienceinsocietyadvanced.org/data/files/evaluate-articles-about-the-universe-453.pdf</a>	
<b>Science and non-science</b>	Activity
This activity considers the difference between scientific and non-scientific ideas, in the context of the origins of life. The ideas include the hypothesis that life did not originate on Earth. As such it highlights the significance of any future discovery of life elsewhere, and hence the profound cultural importance of ‘SETI’ projects. It is, of course, an area of sensitivity, and the activity does not set out to do anything other than to explore the distinction between scientific ideas and ideas provided by written authority. <a href="http://www.scienceinsocietyadvanced.org/data/files/science-and-non-science-337.pdf">http://www.scienceinsocietyadvanced.org/data/files/science-and-non-science-337.pdf</a>	
<b>Breaking News</b>	Activity
This activity provides an opportunity to look at some newspapers and at how they report science-based issues. It also suggests that discovery of new forms of life would be big news. <a href="http://www.scienceinsocietyadvanced.org/data/files/breaking-news-339.pdf">http://www.scienceinsocietyadvanced.org/data/files/breaking-news-339.pdf</a>	
<b>Website List</b>	Web links & other resources
